

## Press Release

### KIII-TV Chooses Logitek

June 22, 2011, Houston, TX – KIII-TV in Corpus Christi, Texas has ordered a Logitek Networked Console System composed of an AE-32 Audio Engine and a ROC-18 console. The system will be integrated by Lubbock Audio Visual.

The **AE-32 (Audio Engine)** TDM router offers advanced mixing, routing and control functions along with on-board dynamics, EQ, delay and 24 mix-minus feeds. Its card frame architecture supports analog I/O, digital I/O, and networking with other AE-32 units via dual 1 Gbit optical ports. The Audio Engine accommodates 5.1 mixing, sub-frame delay and blend controls; it also interfaces to automated production control systems, router and editor protocols including Jupiter<sup>®</sup> and D-ESAM<sup>®</sup>, and is capable of following an EDL.

Logitek's newest console, the **ROC**, brings easy operation and durable construction to an attractive desktop design. ROC consoles are available in multiples of 6 faders (up to 24) with a monitor module that includes controls for source selection, timer start / stop, two monitor feeds and headphone output. The monitor module also includes 12 user-assignable softkeys with LED illumination. High quality Penny & Giles<sup>®</sup> faders, OLED source indicators and more make the ROC both enjoyable and easy to use. Two sizes of meter bridges are available, along with Logitek's vScreen software application which allows the user to populate a VGA screen with meter banks, router controls and other information.

#### **About Logitek**

Founded in 1979, Logitek Electronic Systems, Inc. designs and manufactures digital audio console, routing, switching and metering products for the broadcast and professional audio industries. Logitek Networked Console Systems are used in radio and television facilities worldwide.
